R1. Condition for Admission:

Condition for admission to the first year of the three year Diploma Programme shall be required to have passed in

The S.S.L.C Examination of the board of Secondary Education, Tamilnadu
(or)
The Anglo Indian High School Examinations with eligibility for Higher Secondary Course in Tamilnadu
(or)
The Matriculation Examination of Tamilnadu.
(or)
Any other Examination recognized as equivalent to the above by the Board of Secondary Education, Tamilnadu.

R2. Eligibility for the diploma:

A candidate shall be (i). Eligible for a Certificate in Mining Engineering, if passed first year and discontinued the Programme (ii). Eligible for a Pre-Diploma Certificate in Mining Engineering, if passed up to second year and discontinued the programme and (iii). Eligible for a Diploma certificate, if the candidate has satisfactorily undergone the prescribed courses of study for a period of not less than three academic years and has passed the prescribed examinations in all the three academic years.

Candidates who obtained the certificate of Mining Engineering can also rejoin at a later date in the second year and who obtained the Pre-Diploma Certificate in the third year to complete the Diploma in Mining Engineering.

R3. Courses of study and Scheme of the Examinations:

The courses of study and the syllabi for the courses are given separately. The scheme of Examinations is also given separately.

R4. Duration of the programme:

A student is normally expected to complete the Diploma programme in three years but in any case not more than six years from the time of admission.
R5. Assessment:

The break-up of assessment and examination marks for theory and practical courses is as follows.

- First assessment (Mid-term Test –I): 10 marks
- Second assessment (Mid-term Test –II): 10 marks
- Third Assessment (Assignment/Maintenance of Record Book): 05 marks
- Examination: 75 marks

The Practical Training/Project work will be assessed for 25/75 marks by a committee consisting of the guide and a minimum of two members nominated by the Head of the Department. One of the committee members will be nominated as the chairman by the Head of the Department. The Head of the Department may himself be a member or the chairman. 75/225 marks are allotted for the Practical Training/Project work and viva voce examination at the end of the semester.

R6. Student Counsellors:

To help the students in planning their course of study and for general advice on the academic programme, the Head of the Department will attach a certain number of students to a member of the faculty who shall function as a student counsellor for those students throughout their period of study.

R7. Attendance requirements:

To be eligible to appear for the examination in a particular course, a student must put in a minimum of 75% of attendance in that course. However, the Vice-Chancellor may give a rebate/concession not exceeding 10% in attendance for exceptional cases only on Medical grounds.

A student who does not meet the minimum attendance requirement in a course must re-register for and repeat the course.

R8. Criteria for passing the Programme:

A candidate is deemed to have passed in a course if he/she secures a minimum of 40% marks (30 Marks out of 75) in the final examination and a minimum of 50% marks in both final examination and continuous assessment marks put together (50 marks out of Total 100 marks). Same minimum percentage of marks is adopted for passing the project work also.

R9. Classification of Successful Candidates:

A Candidate will be declared to have passed in First Class with Distinction if he/she secures not less than 75% of the aggregate marks in all the semesters put together and passes all the semesters in the first appearance itself within the stipulated period of study (3 years) without any break.
A Candidate will be declared to have passed in **First Class** if he/she secures not less than 60% of the aggregate marks in all the semesters put together and passes all the subjects within 4 years.

All other successful candidates will be declared to have passed in **Second Class**.

**R10. Ranking of candidates:**

The candidates who are eligible to get the Diploma in First Class with distinction will be ranked together on the basis of the percentage of marks obtained by them in all the subjects of study from I to VI semester.

The candidates passing with First class will be ranked next after those with distinction on the basis of the percentage of marks obtained by them in all the subjects of study from I to VI Semester.

**R11. Transitory Regulations:**

The University shall have powers to revise or change or amend the regulations, the scheme of examinations, the courses of study and the syllabi from time to time.

Wherever there had been change of syllabi, examinations based on the existing syllabus will be conducted for three consecutive times after implementation of the new syllabus in order to enable the students to clear the arrears. Beyond that, the students will have to take up their examinations in equivalent subjects, as per the new syllabus, on the recommendations of the Head of the Department concerned.

* Viva-Voce
DMIC 101 - TECHNICAL ENGLISH I

Unit I

Listening - Introducing learners to GIE - Types of listening - Listening to audio (verbal & sounds); Speaking - Speaking about one’s place, important festivals etc. – Introducing oneself, one’s family / friend; Reading - Skimming a reading passage – Scanning for specific information - Note-making; Writing - Free writing on any given topic (My favorite place / Hobbies / School life, etc.) - Sentence completion - Autobiographical writing (writing about one’s leisure time activities, hometown, etc.); Grammar - Prepositions - Reference words - questions - Tenses (Simple); Vocabulary - Word formation - Word expansion (root words / etymology); E-materials - Interactive exercises for Grammar & Vocabulary - Reading comprehension exercises - Listening to audio files and answering questions.

Unit II

Listening - Listening and responding to video lectures / talks; Speaking - Describing a simple process (filling a form, etc.) - Asking & answering questions - Telephone skills – Telephone etiquette; Reading – Critical reading - Finding key information in a given text - Sifting facts from opinions; Writing - Biographical writing (place, people) - Lab descriptions (general especific description of laboratory experiments) - Definitions - Recommendations; Grammar - Use of imperatives - Subject-verb agreement; Vocabulary - Compound words - Word Association; E-materials - Interactive exercises for Grammar and Vocabulary - Listening exercises with sample telephone conversations / lectures – Picture-based activities.

Unit III

Listening - Listening to specific task - focused audio tracks; Speaking - Role-play – Simulation Group interaction - Speaking in formal situations (teachers, officials, foreigners); Reading and interpreting visual material; Writing - Jumbled sentences - Coherence and cohesion in writing - Channel conversion (flowchart into process) - Types of paragraph (cause & effect / compare & contrast / narrative / analytical) - Informal writing (letter/e-mail/blogs)- Paraphrasing; Grammar - Tenses (Past) - Use of sequence words - Adjectives; Vocabulary - Different forms and uses of words, Cause and effect words; E-materials - Interactive exercises for Grammar and Vocabulary - Excerpts from films related to the theme and follow up exercises Pictures of flow charts and tables for interpretations

Unit IV

Listening - Watching videos / documentaries and responding to questions based on them; Speaking - Responding to questions - Different forms of interviews - Speaking at different types of interviews; Reading - Making inference from the reading passage - Predicting the content of a reading passage; Writing - Interpreting visual materials (line graphs, pie charts etc.) - Essay writing – Different types of essays; Grammar - Adverbs – Tenses – future time reference; Vocabulary - Single word substitutes - Use of abbreviations & acronyms; E-materials - Interactive exercises for Grammar and Vocabulary - Sample interviews - film scenes - dialogue writing.
Unit V

Listening - Listening to different accents, Listening to Speeches / Presentations, Listening to broadcast & telecast from Radio & TV; Speaking - Giving impromptu talks, Making presentations on given topics; Reading - Email communication - Reading the attachment files having a poem/joke/proverb - Sending their responses through email Writing - Creative writing, Poster making; Grammar - Direct and indirect speech; Vocabulary - Lexical items (fixed / semi fixed expressions); E-materials - Interactive exercises for Grammar & Vocabulary - Sending emails with attachment – Audio / video excerpts of different accents, - Interpreting posters

Text Books:

Reference Books:
DMIC 102 - MATHEMATICS I

Unit I MATRICES

Unit II INFINITE SERIES

Unit III FUNCTIONS OF SEVERAL VARIABLES 9+3

Unit IV IMPROPER INTEGRALS

Unit V MULTIPLE INTEGRALS

Text Books:

References:
Unit I  PROPERTIES OF MATTER

Unit II  ACOUSTICS AND ULTRASONICS

Unit III  THERMAL PHYSICS

Unit IV  APPLIED OPTICS

Unit V  SOLID STATE PHYSICS

Nature of bonding - growth of single crystals (qualitative) - crystal systems - crystal planes and directions - expressions for interplanar distance - coordination number and packing factor for simple structures: SC, BCC, FCC and HCP - structure and significance of NaCl, ZnS, diamond
and graphite - crystal imperfections: point defects, dislocations and stacking faults - Unit cell, Bravais space lattices - miller indices.

Text Books:

References:

DMIC 104 - ENGINEERING CHEMISTRY

Unit I       CHEMICAL THERMODYNAMICS
Second law: Entropy - entropy change for an ideal gas, reversible and irreversible processes; entropy of phase transitions; Clausius inequality. Free energy and work function: Helmholtz and Gibbs free energy functions; Criteria of spontaneity; Gibbs- Helmholtz equation; Clausius-Clapeyron equation; Maxwell relations – Van’t Hoff isotherm and isochore. Chemical potential; Gibbs-Duhem equation – variation of chemical potential with temperature and pressure.

Unit II      POLYMER CHEMISTRY
Introduction: Classification of polymers – Natural and Synthetic; Thermoplastic and Thermosetting. Functionality – Degree of polymerisation. Types and mechanism of polymerisation: Addition (Free Radical, cationic, anionic and living); condensation and copolymerisation. Properties of polymers: Tg, Tacticity, Molecular weight – weight average, number average and polydispersity index. Techniques of polymerisation: Bulk, emulsion, solution and suspension.

Unit III      KINETICS AND CATALYSIS

Unit IV      PHOTOCHEMISTRY AND SPECTROSCOPY

Unit V      NANOCHEMISTRY
Text Books:

Reference Books:

DMIP- 105 PHYSICS LABORATORY

List of Experiments
1. Torsional pendulum – Determination of rigidity modulus of wire and moment of inertia of disc
2. Non – uniform bending – Determination of young’s modulus
3. Lee’s disc’ – Determination of thermal conductivity of a bad conductor
4. Potentiometer – Determination of thermo e.m.f. of thermocouple
5. Air wedge – Determination of thickness of a thin sheet of paper
6. Optical fibre – Determination of Numerical Aperture and acceptance angle
7. Compact disc – Determination of width of the groove using laser
8. Acoustic grating – Determination of velocity of ultrasonic waves in liquids
9. Post office box – Determination of Band gap of a semiconductor
10. Spectrometer – Determination of wavelength using grating
11. Viscosity of liquids – Determination of co-efficient of viscosity of a liquid by Poiseuille’s flow

DMIP – 106 CHEMISTRY LABORATORY

List of Experiments
1. Estimation of HCl using Na2CO3 as primary standard and Determination of alkalinity in water sample.
2. Determination of total, temporary & permanent hardness of water by EDTA method.
3. Determination of DO content of water sample by Winkler’s method.
4. Determination of chloride content of water sample by argentometric method.
5. Estimation of copper content of the given solution by Iodometry.
6. Determination of strength of given hydrochloric acid using pH meter.
7. Determination of strength of acids in a mixture of acids using conductivity meter.
8. Estimation of iron content of the given solution using potentiometer.
9. Estimation of iron content of the water sample using spectrophotometer (1,10- phenanthroline / thiocyanate method).
10. Estimation of sodium and potassium present in water using flame photometer.
14. Determination of CMC.
15. Phase change in a solid.

DMIP – 107 COMPUTER PRACTICES LABORATORY

List of Experiments:
1. Search, generate, manipulate data using MS office/ Open Office
2. Presentation and Visualization – graphs, charts, 2D, 3D
3. Problem formulation, Problem Solving and Flowcharts
4. C Programming using Simple statements and expressions
5. Scientific problem solving using decision making and looping.
6. Simple programming for one dimensional and two dimensional arrays.
7. Solving problems using String functions
8. Programs with user defined functions
9. Program using Recursive Function and conversion from given program to flow chart.
10. Program using structures and unions.
DMIP 108 - ENGINEERING PRACTICES LABORATORY

List of Experiments

Welding

Basic Machining

Simple turning, drilling and tapping operations. Machine assembly Practice.

Study and assembling the following: Centrifugal pump and air conditioners.

Demonstration on

1. Smith operations like the production of hexagonal bolt.
2. Foundry operation like mould preparation for grooved pulley.

Plumbing

Basic pipe connections involving the fittings like valves, taps, coupling, unions, reducers, elbows and other components used in household fittings. Preparation of plumbing line sketches.
DMIC 201-TECHNICAL ENGLISH II

Unit I

Listening - Listening to informal conversations and participating; Speaking - Opening a conversation (greetings, comments on something, weather) - Turn taking - Closing a conversation (excuses, general wish, positive comment, thanks); Reading - Developing analytical skills, Deductive and inductive reasoning - Extensive reading; Writing - Effective use of SMS for sending short notes and messages - Using ‘emoticons’ as symbols in email messages; Grammar - Regular & irregular verbs - Active and passive voice; Vocabulary - Homonyms (e.g. ‘can’) - Homophones (e.g. ‘some’, ‘sum’); E-materials - Interactive exercise on Grammar and vocabulary – blogging; Language Lab - Listening to different types of conversation and answering questions.

Unit II

Listening - Listening to situation based dialogues; Speaking - Conversation practice in real life situations, asking for directions (using polite expressions), giving directions (using imperative sentences), Purchasing goods from a shop, Discussing various aspects of a film (they have already seen) or a book (they have already read); Reading - Reading a short story or an article from newspaper, Critical reading, Comprehension skills; Writing - Writing a review / summary of a story / article, Personal letter (Inviting your friend to a function, congratulating someone for his success, thanking one’s friend / relatives); Grammar - modal verbs, Purpose expressions; Vocabulary - Phrasal verbs and their meanings, Using phrasal verbs in sentences; E-materials - Interactive exercise on Grammar and vocabulary, Extensive reading activity (reading stories/novels from links), Posting reviews in blogs - Language Lab - Dialogues (Fill up exercises), Recording students’ dialogues.

UNIT III

Listening - Listening to the conversation - Understanding the structure of conversations; Speaking - Conversation skills with a sense of stress, intonation, pronunciation and meaning-Seeking information – expressing feelings (affection, anger, regret etc.); Reading - Speed reading – reading passages with the time limit - Skimming; Writing - Minutes of meeting – format and practice in the preparation of minutes - Writing summary after reading the articles from the journals - Format for the journal articles – elements of technical articles (abstract, introduction, methodology, results, discussion, conclusion, appendices, references) - Writing strategies; Grammar - Conditional clauses - Cause and effect expressions; Vocabulary - Words used as nouns and verbs without any change in the spelling (e.g. ‘rock’, ‘train’, ‘ring’); E-materials. - Interactive exercise on Grammar & vocabulary - Speed Reading practice exercises; Language Lab - Intonation practice using EFLU materials – Attending a meeting and writing minutes.
UNIT IV

Listening - Listening to a telephone conversation, Viewing a model interview (face-to-face, telephonic and video conferencing) and observing the practices; Speaking - Role play practice in telephone skills - listening and responding, -asking questions, -note taking – passing on messages, Role play and mock interview for grasping the interview skills; Reading - Reading the job advertisements and the profile of the company concerned – scanning; Writing - Applying for a job – cover letter - résumé preparation – vision, mission and goals of the candidate; Grammar - Numerical expressions - Connectives (discourse markers); Vocabulary- Idioms and their meanings – using idioms in sentences; E-materials - Interactive exercises on Grammar & Vocabulary - Different forms of résumés- Filling up a résumé / cover letter; Language Lab - Telephonic interview – recording the responses - e-résumé writing.

UNIT V

Listening - Viewing a model group discussion and reviewing the performance of each participant - Identifying the characteristics of a good listener; Speaking - Group discussion skills – initiating the discussion – exchanging suggestions and proposals – expressing dissent/agreement – assertiveness in expressing opinions – mind mapping technique; Reading - Note making skills – making notes from books, or any form of written materials Intensive reading Writing - Types of reports – Feasibility / Project report – report format – recommendations / suggestions – interpretation of data (using charts for effective presentation); Grammar - Use of clauses; Vocabulary – Collocation; E-materials - Interactive grammar and vocabulary exercises - Sample GD - Pictures for discussion, Interactive grammar and vocabulary exercises - Pictures for discussion; Language Lab - Different models of group discussion.

Text Books:

Reference Books:
DMIC 202- MATHEMATICS II

Unit I DIFFERENTIAL EQUATIONS
Method of variation of parameters – Method of undetermined coefficients – Homogenous equation of Euler’s and Legendre’s type – System of simultaneous linear differential equations with constant coefficients.

Unit II VECTOR CALCULUS
Gradient and directional derivative – Divergence and Curl – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral and volume integral - Green’s, Gauss divergence and Stokes theorems – Verification and application in evaluating line, surface and volume integrals.

Unit III ANALYTIC FUNCTION

Unit IV COMPLEX INTEGRATION

Unit V LAPLACE TRANSFORMS
Existence conditions – Transforms of elementary functions – Transform of Unit step function and Unit impulse function – Basic properties – Shifting theorems -Transforms of derivatives and integrals – Initial and final value theorems – Inverse transforms – Convolution theorem — Transform of periodic functions – Application to solution of linear ordinary differential equations with constant coefficients.

Text Books:

References:
DMIC 203 MATERIALS SCIENCE

Unit I MECHANICAL PROPERTIES:

Unit II PHASE DIAGRAMS
Solid solutions - Hume Rothery’s rules - free energy of solid solution - intermediate phases - The phase rule - single component system - one-component system of iron - binary phase diagrams - isomorphous systems - the tie-line rule - the level rule - application to isomorphous system - eutectic phase diagram - peritectic phase diagram - other invariant reactions - microstructural change during cooling.

Unit III FERROUS ALLOYS AND HEAT TREATMENT

Unit IV ELECTRONIC MATERIALS
Classification of solids - energy bands - concept of Fermi level - conductor, semiconductor, insulator - Semiconductors: intrinsic, extrinsic - carrier concentration expression (qualitative) - compound semiconductors (qualitative) - dielectric materials - polarization mechanisms - dielectric breakdown - magnetic materials - ferromagnetic materials & hysteresis - ferrites - superconducting materials, properties, types and applications.

Unit V NEW MATERIALS AND APPLICATIONS

Text Books:

Reference Books:
DMIC 204- CHEMISTRY FOR MINING ENGINEERING

Unit I       WATER TREATMENT

Unit II      POLYMERS, LUBRICANTS AND ADHESIVES

Unit III    CORROSION AND CORROSION INHIBITION

Unit IV      ABRASIVES AND CHEMISTRY OF BUILDING MATERIALS

Unit V       FUELS AND EXPLOSIVES

Text Books:

Reference Books:
DMIC 205 - ENGINEERING MECHANICS

Unit I  BASICS AND STATICS OF PARTICLES  12
Introduction – Units and Dimensions – Laws of Mechanics – Lami’s theorem, Parallelogram and
triangular Law of forces — Vectorial representation of forces – Vector operations of forces -
additions, subtraction, dot product, cross product – Coplanar Forces – rectangular components –
Equilibrium of a particle – Forces in space – Equilibrium of a particle in space -Equivalent
systems of forces – Principle of transmissibility.

Unit II  EQUILIBRIUM OF RIGID BODIES  12
Free body diagram – Types of supports –Action and reaction forces –stable equilibrium –
Moments and Couples – Moment of a force about a point and about an axis – Vectorial
representation of moments and couples – Scalar components of a moment – Varignon’s theorem –
Single equivalent force -Equilibrium of Rigid bodies in two dimensions – Equilibrium of Rigid
bodies in three dimensions.

Unit III  PROPERTIES OF SURFACES AND SOLIDS  12
Centroids and centre of mass– Centroids of lines and areas - Rectangular, circular, triangular areas
by integration – T section, I section, - Angle section, Hollow section by using standard formula –
Theorems of Pappus - Area moments of inertia of plane areas – Rectangular, circular, triangular
areas by integration – T section, I section, Angle section, Hollow section by using standard
formula – Parallel axis theorem and perpendicular axis theorem –Principal moments of inertia
of plane areas – Principal axes of inertia-Mass moment of inertia –mass moment of inertia for
prismatic, cylindrical and spherical solids from first principle – Relation to area moments of
inertia.

Unit IV  DYNAMICS OF PARTICLES  12
Displacements, Velocity and acceleration, their relationship – Relative motion – Curvilinear
motion -Newton’s laws of motion – Work Energy Equation– Impulse and Momentum – Impact of
elastic bodies.

Unit V  FRICTION AND ELEMENTS OF RIGID BODY DYNAMICS  12
Friction force – Laws of sliding friction – equilibrium analysis of simple systems with sliding
friction –wedge friction-. Rolling resistance -Translation and Rotation of Rigid Bodies – Velocity
and acceleration – General Plane motion of simple rigid bodies such as cylinder, disc/wheel and
sphere.

Text Books:

References:
   company, New Delhi (2008).
DMIC 206 - MINE DEVELOPMENT

Unit I  INTRODUCTION TO MINING

History of mining, contribution of mining to civilisation and national economy. Indian mineral resources and world status, role of mining engineers in industry. Introduction to opencast and underground coal & metalliferous mining – selection criteria, comparison. Modes of entry into deposits for underground mining – shafts, inclines, adits, etc.

Unit II  INTRODUCTION TO DRILLING

Principles of drilling, methods, selection, applications and limitations, drill bits, flushing methods, fields of application, exploration and production drilling, drilling in underground workings, variables affecting the performance of drilling, novel methods of drilling.

Unit III  SHAFT SINKING

Selection of site and size, sinking methods, support system, ventilation, lighting and drainage arrangements during sinking, material handling and safety in sinking shafts. Introduction to piling, caisson and freezing methods - cementation method - widening and deepening of shafts. Modern techniques of shaft sinking – shaft boring, design of shaft insets, pit bottom excavation and shaft raising.

Unit IV  INTRODUCTION TO EXPLOSIVES AND BLASTING

Types of explosives, fuses, detonators and other accessories, alternatives to explosives, cause of accidents and safety precautions, drilling and blasting pattern for underground excavations, merits, demerits and limitations of blasting. Storage and transport of explosives.

Unit V  DRIFTING AND TUNNELING

Drivage of drifts, organisation and cycle of operations, supporting of development workings, modern methods of drifting, tunnelling, road heading and tunnel boring.

External Thread cutting Internal Thread Cutting Eccentric Turning Knurling
Square Head Shaping Hexagonal Head Shaping
DMIC 301- MINING GEOLOGY I

Unit I  Physical Geology

Unit II  Geomorphology

Unit III  Mineralogy

Physical properties of minerals – rock forming minerals –physical and chemical properties of important rock forming minerals: quartz, feldspar, pyroxene, amphibole, mica, olivine and garnet group of minerals and calcite.

Unit IV  Petrology

Unit V  Structural Geology

Text Books:

Reference Books:

DMIC 302 - STRENGTH OF MATERIALS

Unit I  Stress, Strain And Deformation Of Solids

Unit II  Transverse Loading On Beams And Stresses In Beam

Unit III  Torsion

Torsion formulation stresses and deformation in circular and hollows shafts – Stepped shafts- Deflection in shafts fixed at the both ends – Stresses in helical springs – Deflection of helical springs, carriage springs.

Unit IV  Deflection Of Beams

Double Integration method – Macaulay’s method – Area moment Theorems for computation of slopes and deflections in beams - Conjugate beam and strain energy – Maxwell’s reciprocal theorems.

Unit V  Thin Cylinders, Spheres And Thick Cylinders

Stresses in thin cylindrical shell due to internal pressure circumferential and longitudinal stresses and deformation in thin cylinders – spherical shells subjected to internal pressure – Deformation in spherical shells – Lame’s theory – Application of theories of failure.

Text Books:

References Books:

DMIC 303 - MINE SURVEYING

Unit I UNDERGROUND SURVEY AND MODERN SURVEYING METHODS 14

Special features of Underground Mining surveying; Correlation of Surface and underground mine workings; operational details and applicable errors in each; methods of transferring levels to different landings/ levels/ horizon; Illustrative examples: Measurement of shaft depth Application of Remote sensing and photogrammetry in exploration and mining; EDM; Electronic theodolite, Electronic Tachometer (Total station); Laser Theodolite; GPS; GIS; DTM Applicability and limitations.

Unit II ADJUSTMENT OF SURVEY MEASUREMENT 10

Most probable value, laws of weights; principle of least square; uncorrelated values of unequal precision; Adjustment of figures – Simple triangle, two connected triangles, crossed quadric lateral, hubangle correction (polygon); errors and adjustment in steep sights; striding level; Application of top eccentric and side eccentric telescopes Illustrative examples:

Unit III ALIGNMENT SURVEY AND TACHOMETRY 10

Alignment / Gradient control of vertical and inclined shafts; gradient control in development openings; Holing surveys; Application of appropriate methods, equipment, operational control; Alignment in Headgears, machinery foundation etc Illustrative examples:

Unit IV STOPE & SUBSIDENCE SURVEYS AND MINE PLANS 9

Stope survey – objectives, methods, preparation of stope plan, preparation of mine plan subsidence survey – Subsidence trough, factors influencing subsidence, protective pillars, guidelines subsidence in laying out monitoring stations, methods of survey, statutory provisions and circulars. Preparation of Mine plans and sections; stepped plan; Allay plan; Duties and responsibilities of mine surveyor under mines act and connected legislations.

Unit V CONTOURING AND CURVE SETTING MISCELLANEOUS SURVEY APPLICATIONS 17

Methods of Contouring; contour gradient; uses of contours; Reservoir / Catchment area calculations Illustrative examples: setting out underground / curves; need for curves; types of curves; methods of curve setting Dip/ Strike / Fault interpretation from inclined angle vertical borehole data in dipping and plunging formations; interpretations of borehole maps; borehole deviation; calculation of plunge in folded terrain.
Text Books:
1. Winniberg, F., Metalliferous Mine Surveying

References Books:
Unit 1 Introduction

Man and Environment: Overview (socio-economic structure & occupational exposures) – Scope of Environmental Engineering – pollution problems due to urbanization & industrialization

Air Pollution and Water Pollution:

Causes of air pollution – types & sources of air pollutants- Climatic & Meteorological effect on air pollution concentration- formation of smog and fumigation.

Water Sources
Origin of waste water – Types of water pollutants and their effects

Different Sources of Water Pollution

Unit – II Analysis of Air Pollutants

Air Pollution Control Measures & Equipment - Control of Particulate Emission – Control of Gaseous Emission – Flue Gas Treatment Methods : Stacks Gravitational and Inertial Separation, Settling Chambers, Dynamic Separators, Cyclones, Filtration, Liquid Scrubbing, Spray Chambers, Packed Towers, Orifice and Ventury Scrubbers, Electrostatic Precipitators, Gas/solid Adsorption, Thermal Decomposition

Unit – III Methods & Approach of Air Pollution Control

Controlling smoke nuisance – Develop air quality criteria and practical emission standards – Creating zones suitable for industry based on micrometeorology of air area – Introducing artificial methods of removal of particulate and matters of waste before discharging to open atmosphere

Unit – IV Soil Polluting Agencies & Effect of Pollution

Solid Waste Disposal

Unit – V Noise Pollution & Control

Noise Pollution: Intensity, Duration – Types of Industrial Noise – Ill effects of Noise – Noise Measuring & Control – Permissible Noise Limits

Environmental Legislations, Authorities & Systems

Air & Water Pollution Control Acts & Rules (Salient Features only) – Functions of State / Central Pollution Control Boards – Environmental Management System: ISO 14 000 (Salient Features only

DMIC 305 - SURFACE MINING

Unit I INTRODUCTION

Important terms and definitions pertaining to surface mining operations. Introduction to surface mining methods. Status of surface mining, types of surface mine operations. Concept of stripping ratio, stripping economics, ultimate pit limits. Elements of surface mine planning. Major factors affecting exploitation of mineral resources.

Unit II LAYOUT AND DESIGN OF SURFACE MINES

Unit III DEVELOPMENT OF SURFACE MINES

Unit IV EXCAVATION SYSTEM IN SURFACE MINES

Surface mining technology. Selection criteria for excavation / loading and material transport equipment used in surface mines. Classification, construction, capacity, operation, productivity and application of different types of excavating / loading equipment used in surface mines. Surface mining technology – Open-cast mining practices by bucket wheel excavators. Open-cast mining practices by Surface Miner. Problems of Deep open-cast mining.

Unit V TRANSPORT AND WASTE DUMPS

Scope and application of different modes of transport system in surface mines – Trucks, belt conveyors (shift able and high-angle), Aerial ropeways, Rail transport and Pipeline transport systems. Scope and application of in-pit crushers in surface mines. Types of waste dump – internal and external; dump formation methods and corresponding equipment; Dump stability and stabilization measures. Health and safety in surface mining.

Note: All Statutory aspects like CMR, MMR and relevant DGMS circulars are to be covered by the faculty.
Text Books:

References Books:

UNIT I Exploratory Drilling

Drilling for exploration and other purposes; various types of drilling equipment – their merits, demerits and limitations; core recovery – single and double tube core barrels, wire line drilling; directional drilling, fishing tools; borehole surveying; borehole logging; novel and special drilling techniques. Drilling for oil and ground water.

UNIT II Production Drilling

Production drilling; Various methods of drilling - percussive, rotary, rotary percussive, Factors affecting drilling; mechanics of drilling; drill ability and drilling index; micro-bit drilling; selection of drilling equipment; different types of bit, bit wear; drill hole economics; case studies

UNIT III Explosives, Accessories And Tools

Explosives and Blasting Agents- ANFO, slurry, emulsion, LOX, permitted explosives, bulk explosives; Selection of explosives; Blasting accessories, Initiation systems, Testing of explosives; Storage, transportation and handling of explosives; Destruction of explosives and accessories. Theories of rock breakage; mechanics of rock fragmentation by explosive action, Instrumentation in blasting – V.O.D probe, vibration monitoring, high speed video camera, etc.

UNIT IV Blasting In Underground Mines

Design of blast for coal and metal underground mines – gallery, Solid blasting techniques, periphery blasting, drilling pattern for tunneling and shaft sinking, controlled blasting techniques, dangers associated with underground blasting and preventive measures; misfires, blown out shots, incomplete detonation – their causes and remedial measures.

UNIT V Blasting In Surface Mines And Allied Engg. Fields

Methods of blasting in surface mines, Blast design, Primary and secondary blasting, Rock fragmentation studies, Dangers associated with blasting in opencast mines and preventive measures, Environmental impacts due to blasting, Controlled blasting techniques, Blasting in opencast coal mines of developed galleries, Blasting economics, Computer aided design of blasts.

Blasting for road constructions, trench cutting, demolition of buildings etc; Blasting for Dimensional stones; Underwater blasting. Alternatives to blasting.

Note: Relevant portions of Coal and Metalliferous Mines Regulations, DGMS Circulars shall be covered wherever required.

MIP 307 - Mine Development Drilling and Blasting Laboratory

List of Experiments

1. Study of accessories of boring machines and boring rig.
2. Study, sketch & use of the boring and fishing tools.
3. Study and sketch of Hydraulic feed mechanism of the drilling machine.
4. Study and sketch of double tube core barrel
5. Study and sketch of various types of detonators and relay
6. Study of different types of exploders.
7. Study of construction and use of stemming rods, scraper cum break detector, blasting cable, circuit tester etc
8. Study and sketch of approved types of explosive magazines
9. Study & sketch of different types of initiation.
10. Study & sketch of Hydraulic Splitter / Cordex

DMIP 308 - MINE SURVEYING LABORATORY

List of Experiments

1. Theodolite traverses survey.
3. Close traversing by Theodolite & balancing by Bowditch rule & transit rule.
4. Study of Miners Dial its constructional features & adjustments
5. Study of measurement of Depth of a vertical shaft.
7. Determine the true apparent dip & strike from bore hole data.
DMIC 401 - MINING GEOLOGY II

Unit I Economic Geology

Ore forming process, mineral deposits formed from magmatic, hydrothermal and volcanic process: mechanical concentration, oxidation and supergene enrichment.

Unit II Economic Mineral Deposits

Metallic and non-metallic deposits, study of graphite, copper, zinc, lead, gold, iron, manganese, radioactive minerals, asbestos, mica, gemstone-origin, mode of occurrence and distribution in India. Origin, occurrence and Indian distribution of industrial minerals-ceramic, refractory, abrasive, glass and natural pigments.

Unit III Coal And Petroleum Geology

Origin, physical properties, processes, occurrence of coal and its types, petroleum deposits. Petroliferous basins of India. Ore reserve estimation and UNFC.

Unit IV Mineral Exploration

Unit V Remote Sensing Application In Geological Studies

Introduction to aerial and satellite remote sensing. photo recognition elements; applications of remote sensing and GIS in geological mapping and mineral exploration.

Text Books:

Reference Books:

DMIC 402 - MINING MACHINERY- I

Unit I: Wire Ropes

Unit II: Transportation In Mines -Rope Haulages

Unit III: Transportation In Mines -Conveyors
Conveyor usage, classification - belt conveyor system, different types of belt constructions, safety devices merits, demerits and limitations of Best conveying system - compilation of numerical problems to find the material quantity H.P. length and inclination of haulage, tensing strength breaking strength of belt amount of slip. Scraper chain convey or system, protective devices-merits, demerits and limitation.

Unit IV: Transportation In Mines –Locomotives & Ariel Ropeways
Transportation in Mines -Locomotives & Areal rope ways -Classify loco haulage systems, merits, demerits, applicabilities of different system - clarifies aerial roper ways, the applicable conditions of aerial ropeways.

Unit V: Introduction To Coal Processing/Beneficiation Machinery
Why beneficiation-methods of beneficiation- quality control-material handling while beneficiation - rushing-screening stacking-washing, Tailings dam-disposal of tailings - Coal washery & washing of coal etc.
Text Books:

1. Handbook of Metalliferous Mining Methods by Y.P., Chacharkar, Lovely Prakashan, Dhanbad.
2. Elements of Mining Technology, D.J. Deshmukh Vol.3

References Books:

1. Mine Transport by Kerlin
2. Introduction to mining, G.K, Pradhan, Mintech Publications, Bhubaneswar
DMIC 403 - UNDERGROUND MINING METHODS - COAL

Unit I Introduction

Status of coal industry and deposit factors affecting choice of mining methods, classification of mining methods, grading and analysis of coal.

Unit II Bord And Pillar Method-Development

Design and development of a district, bord and pillar, room and pillar methods, with conventional and continuous mining techniques; panel system.

Unit III Bord And Pillar Method – Extraction

Pillar extraction by caving and stowing methods; mechanised extraction of pillars, shaft pillar extraction, systematic supports, surface, underground and face arrangements for stowing.

Unit IV Longwall Method

Advance and retreat methods, continuous and cyclic systems, extraction with different machines- loughs, shearsers, design of long wall workings, optimum length of face, size of panel, gates, support system, personnel, organisation and safety measures, salvaging in long wall.

Unit V Special Methods Of Working

Problems of working thick & thin seams, multi slices, sublevel caving, horizon mining, gallery blasting method, contiguous seam working, working steeply inclined seams, working under surface structures and seams liable to spontaneous heating, outburst and bumps, etc. hydraulic mining, wongawali, shortwall, underground coal gasification, shield mining.

Note: All the above are to be covered with emphasis on CMR and the relevant circulars

Text Books:

References Books:

2. Das S.K., Modern Coal Mining technology, Lovely Prakashan, Dhanbad1994.

Internet: www.miningindia.com
Unit I Introduction
Definition of some important terms used in rock mechanics, application of rock mechanics in mining, introduction to stress analysis, principal stresses and strains, differential equations of static equilibrium.

Unit II Physical Properties Of Rocks And Rock Indices
Physical properties of rock – density, porosity, moisture content, permeability, swell index, slake durability index, thermal conductivity, hardness, durability, Protodyaknov index, impact strength index, point load index, rock mass classification.

Unit III Mechanical Properties Of Rocks
Preparation of test specimens, laboratory determination of mechanical properties of rocks, compressive strength, tensile strength, shear strength, modulus of elasticity, Poisson’s ratio, triaxial strength of rocks, Mohr’s envelope, effect of various parameters on the strength of rocks, in-situ strength, effect of joints and fracture on mechanical properties of rocks.

Unit IV Non-Destructive Testing Methods And Time Dependent Properties Of Rocks
Dynamic wave velocities, dynamic elastic constants, their determination in the laboratory, application in mining, time dependent properties of rocks, creep, mechanism of creep of rocks – different stages, rheological models.

Unit V Underground Supports
Various methods of roof examination, pressure arch theory, ground forces and field stresses, mechanism, objectives and limitations of supports, conventional supports – column type, timber sets, arches, yielding type; rock and cable bolting, rock grouting, shotcreting, roof stitching, support of shaft bottoms, galleries, junctions and places of roof falls, design of supports, longwall powered supports. Design of systematic support rules for B & P Development, depillaring LW gate readings and extraction.

Text Books:

References Books:
DMIC 405 - MINE VENTILATION

Unit I Mine Gases
Occurrence, properties, physiological effects, detection – types of instruments, construction, principle and limitations, measurement and analysis, methane layering, methane drainage. Methods of ventilation survey, Instruments required for ventilation survey

Unit II Mine Climate And Control
Psychometrics properties of air, Sources of heat and humidity in mines and their effects, heat stress estimation, cooling power of mine air and methods of improving cooling power including air conditioning. Psychometrics surveys.

Unit III Principal Laws Of Air Movement In Underground
Fundamentals of fluid flow and its application in mine ventilation with special reference to Bernoulli’s Equation, Reynolds number, Poiseuille equation, Atkinson’s equation, Karman-Prandtl equation for rough flows, resistance of mine roadways, friction and shock resistance, etc.

Unit IV Natural Ventilation And Air Current Distribution In Mines
Natural ventilation, effect of depth, temperature, pressure, etc. thermodynamic treatment, distribution of air current in mines – splitting, stopping, regulators, ventilation doors, air crossings, controlled recirculation, etc. Retrograde and boundary, ascensional, decensional, homotropal and antitropal ventilation systems, Ventilation in deep and hot mines, remedial measures.

Unit V Mechanical Ventilation & Ventilation Planning
Main mechanical ventilators, booster fans and auxiliary fans, and their selection, installation, fan performance, characteristics and testing, fans in series and parallel, fan drifts and reversal of air current, forcing versus exhaust ventilation, ventilation of long headings including overlap systems. Calculation of pressure and quantity requirements, economic analysis, ventilation standards, network analysis, monitoring of mine environment. principles and computer applications.
Note: All the above are to be covered with emphasis on CMR, MMR and the relevant circulars by the faculty.

Text Books:

Reference Books:
DMIC 406 - MINERAL PROCESSING

Unit I Introduction

Unit II Comminution

Introduction to comminution, primary/secondary/tertiary crushing, purpose, duty, theory of crushing, crushing sequence, reduction ratio, types of crushers and comparison, general crushing flow sheet, wet/dry grinding, mechanism and various affecting parameters.

Unit III Laboratory & Industrial Sizing And Sampling And Control

Purpose, factors governing particle behaviour, laboratory and industrial screen, trommels, vibrating screens, etc. wet and dry screening, classification, classifiers. Purpose, sampling - solid ore, pulp, head feed, grinding circuit samples, flotation products, etc., X-ray fluorescence, automatic sampling. Metallurgical accounting.

Unit IV Separation/Concentration

Newton’s and Stoke’s Laws of particle settlement, different concentration techniques – gravity, chemical froth flotation, wet & dry magnetic separation, electromagnetic, amalgamation, heavy media, jigging, shaking tables, sluicing, spirals, thickeners, filtration, etc., coal washing.

Unit V Special Methods

Chemical extraction, cyanide process, leaching, use of ion exchange, solvent extraction, pilot plant studies on ores, tailing dams; generalised plant practice/flow sheets for coal and other important ores – copper, aluminium, lead, zinc, silver, gold, uranium, iron, limestone, magnesite.

DMIP-407 MINING GEOLOGY LABORATORY I

List of Experiments

1. Study of physical properties of minerals.
2. Study and identification of important rock forming minerals in hand specimen
3. Megascopic studies of important igneous Rocks.
4. Megascopic studies of important sedimentary Rocks.
5. Megascopic studies of important metamorphic Rocks.
6. Study and Identification of important economic minerals in hand specimen
7. Study and sketch of model showing different types of faults, folds and their relations to photography.

DMIP 408 MINING ENVIRONMENTAL LAB I

List of Experiments

1. To determine the psychometric properties, gas percentage in atmosphere.
2. To study the principles and characteristics governing mine fans.
3. To understand lamp design and perform underground illuminations surveys.
4. Study of mine flame safety lamp, gas testing with flame safety lamp, electric cap lamps, lamp room layouts and illumination survey.
5. Study of air-reversal arrangement in mine fans.
7. Determination of air born dust by gravimetric dust sampler, personal dust sampler and by high volume sampler.
9. Determination of crossing point temperature and index of inflammability.
10. Study of self rescuers of different types.
11. Proximate analysis of coal
12. Measurement of vibrations due to various sources.
14. Determination of organic carbon of soil sample
Unit I Rock Mechanics Instrumentation

Conventional testing machines and servo-controlled stiffness testing machines, load cells, strain gauges, flat jacks, convergence indicators, anchorage testing equipment, sag bolts, etc., in situ measurements.

Unit II Pit Slope Stability & Subsidence

Approach to slope stability, slope parameters, Geological and physico-mechanical parameters affecting slope stability, effect of water pressure, determination of factor of safety, introduction to methods of failure analysis. Theories of subsidence, factors affecting subsidence, subsidence surveys, subsidence prediction techniques, subsidence control – surface and underground measures, pseudomining damage.

Unit III Theories of Failure of Rocks & Pillar Design and Rock Burst

12 Different theories of failure of rocks, modes of failure - Griffith, Coulumb, Navier, Mohr’s, 80 Hoek-Brown, etc. Strength of pillars, barrier and shaft pillars design – load estimation, factor of safety, various formulae, rock burst, bumps.

Unit IV Design of Underground Workings

Stress distribution in underground workings, design of underground openings, measurement of rock movements, engineering rock mass classification, rock load assessment and support design, introduction to numerical methods of geomechanics; scaled model studies – principles of modeling and model material and testing.

Unit V Stowing/Filling

Principal methods of stowing, collection, preparation and transport of materials, surface, underground and face arrangements, design of stowing plants.

Text Books:

References Books:

DMIC 502 - UNDERGROUND MINING METHODS - METAL

Unit I   Basics

Metal Mining Terminology; Typical modern metal mine features; typical pre stoping ore block constructional features; classification of methods; Techno economic characteristics impacting on choice of method; Typical Unit cost parameters; optimum size of mine and stope.

Unit II   General Mine Design

Mode of mine and stope entry; Layouts; optimum production; Basic design – Level Intervals, ore pass, common ore pass, size of blocks ore handling in stope and other openings, overview of constructional features – X cuts, Raises, Winzes etc.

Unit III   Stoping – General Description

Unsupported methods – Room and pillar, shrinkage, sublevel stoping etc. Supported stipes – Cut and fill, square set etc. Caving methods – Top slicing, sublevel caving, block caving.

Unit IV   Stope Planning And Layout

Preparing a stoping block; sequence of stoping; organization; production cycle; Unit cost calculation; comparison of methods and costs

Unit V   Novel Innovative Techniques & Special Applications

Rapid excavation; Hydraulic mining; slurry mining; solution mining; Radial – axial splitter; Thermal fragmentation; shock wave breaking; Nuclear mining. Deep mining; narrow contiguous veins; shaft and remnant pillars; VCR; Ring drilling; Large Blast hole stoping. Cast studies of Indian and foreign underground metal mines.

Note: All the above are to be covered with emphasis on MMR and the relevant circulars

Text Books:

DMIC 503 - MINING HAZARDS & SAFETY

Unit I: Mine Fires

Spontaneous Heating, Different stages: Determination of proneness of coal by crossing point, Factors governing proneness to spontaneous combustion, Detection of spontaneous heating symptoms, Preventive measures, Including pannel system layout, Adequate ventilation provisions in design stages, Regular inspections etc.

Unit II: Fires

Underground & quarry fires: Causes of mine fires, Dealing with mine fires, Sealing off, different types of stopping, construction & purposes, Pressure balancing to control air leakage into sealed off fire-areas, Methods of collection of air samples from sealed off fire - areas and from mine atmosphere, Recovery of sealed off mine working on account of fire by reopening.

Unit III Dealing With Fires In Quarry:

Debris, Coal pillars & coal stocks different types of fire extinguishers safety & statutory aspects.

Unit IV: Mine-Explosions:

Fire Damp Explosions:
Limits of inflammability & various factors influencing the same, Causes of fire damp explosions, Preventive measures.

Unit V: Coal Explosions:

Coal Dust Explosions Causes:

Text Books:

1. Elements of Mining Technology Vol-2, D. J. Deshmukh .

References:

1. Hand book on First Aid, Published by Multi Disciplinary Centre on Safety, Health & Environment, Bhubaneswar
DMIC 504 – ADVANCED MINE SURVEYING

Unit I: Theodolite

Magnetic bearing of lines. Traversing - continuous Azimuth, double for sight methods - computation of bearings of traverses check of accuracy in angular measurements - permissible error - distribution - calculation of latitude and departure - problems on rectangular coordinates - calculation of areas - Bowditch Rule

Unit II: Triangulation

Definition - Principles - classification mine Triangulation - scheme of Triangulation - Checks for measuring angles in Triangle - selection of stations - points considered for selection of stations - Baseline measurement in catenary, on level ground - Connections applied on base line determination of true north by astronomical observation method of extension of base line.

Unit III: Setting Curves

Classification - Definitions - elements of simple curve - Method of setting out curves - by chord and offset, chord and angle.

Correlation survey - Purpose - methods of correlation - Direct Traversing - Co - planning - Weisbach Triangle.

Unit IV: Tachometry

Unit V: Stope Survey

Objectives - Methods - Tap Triangulation - Field of application - Typing method Radial Ray method - prepare stope sheets - stope plans with details

**DMIP 505 - MINING GEOLOGY LABORATORY II**

**Ore Geology**

**ORE RESERVE ESTIMATION**

**Remote Sensing & Geophysics**

Study of aerial photographs and satellite imageries. Interpretation of geological geomorphological features from aerial photographs and satellite imageries. Electrical resistivity survey and interpretation of electrical data.

**Geological Field Work**

Geological mapping of igneous, sedimentary and metamorphic terrains. Identification of minerals and ores in the field site. Preparation of lithology and structural maps.

**References:**

DMIP 506 – MINING ENVIRONMENTAL LAB II

List of Experiments

1. Determination of CO, NOx, CH4, H2S, SO2, O2, CO2, by corresponding analyzers.
2. Study and application of infrared gas analyzer.
3. Detection of methane by different types of methanol meters & frame safety lamp.
5. Study and uses of self rescuer Gas mask, smoke helmet.
6. Study and use of reviving apparatus
7. Study of Born-Side safety boning apparatus.
8. Various types of CO-detectors used in mines and their selection criteria
9. Measurement of relative humidity with the help of various types of hygrometer.
10. To find the effect of heat, humidity and air velocity with the help of Kata-thermometer

DMIP – 507 MINING MACHINERY LABORATORY

1. Study of construction of different types of wire ropes and Types of rope chapels used for rope haulages & winding, safety hooks used in winding.
2. Construction and operation of compressed air operated drills
3. Study of different types of haulage systems – tensioning arrangement in endless haulage and different types of haulage clips and other means of attachment of tubs to the rope.
4. Study of haulage track, curves, diamond crossing, construction of Mine tubs and cars along with their couplings.
5. Study of safety devices provided of haulage roads and locomotives - Exhaust conditioning and flame traps & underground Battery charging station layout
6. Electrical power distribution in mines, electrical layout for rope haulages and pumps, Electrical and hydraulic layouts for long wall faces
7. Study of aerial rope ways – driving/tensioning/loading/unloading and angle stations
8. Study of various types of head gear-fleet angle, Study of shaft fittings-signal systems, guides, safety dogs and protective roofing, study of guides– methods of support and tensioning arrangements.
10. Study of different types of conveyors like armored face conveyors, belt conveyors, gate belt conveyors, shaker & vibrating conveyors, high angle conveyors
11. Study of coal drill and its electrical panel/gate end box
12. Study of coal ploughs and shearers
13. Study of continuous minors and road headers
14. Study of pit top & pit bottom layouts in shaft and incline under various conditions.
15. Study of different types of loading machines.
16. Study of earth mining equipments (Diesel Engine) & Hydraulic circuits
DMIP 508 - PRACTICAL TRAINING AND ASSESMENT

AIM:

To provide training in mines for gaining thorough understanding of all the theoretical knowledge.

Gaining practical experience is an important aspect of the mining engineering programme having many characteristic features of its own.

The students have to undergo training in mines during the summer vacation at the end of the IV Semester for a period of 4 weeks and obtain a valid certificate from the competent authority of the organization provide training. The students have to submit a report on the training which would be evaluated during the ensuing V Semester. The training report will be evaluated similar to the Project work.

DMIC 601 - MINE MANAGEMENT AND ENTREPRENEURSHIP

Unit I: Mine management

Role of mining Industry in country’s economic development, ownerships of Industries, Management, organisation, in the context of mining Industry.

Unit II: Entrepreneurship

Unit III: Work Study

Work study, principle of workstudy, scope and necessity of workstudy, Method study, advantages of Method study, time study and principle of time study

Unit IV: Industrial Dispute Act-1947

Industrial Dispute act-1947 causes for Industrial Dispute adverse effects for Industrial Dispute various provisions of ID act works committee, conciliation officer, Bord of conciliation court of enquiry, industrial tribunal, voluntary organisation, strike and lockout.

Unit V: Total Quality and Management

Concepts of Quality and its use in mine production.
Text Books:

1. Mine Management, Legislation and Ground safety : S. Ghatak
2. Mine Management : V.N. Singh

References:

1. Industrial Management : O.P. Khanna
2. Industrial Management : Jain and Bhanu
3. Mines act 1952
5. CMR/MMR 1957 / 61

7. Mineral Economics : D. J. Deshmukh
8. Encyclopaedia of Mining Laws
9. Mine safety and disaster : C.P. Singh
DMIC 602 - ELECTRICAL ENGINEERING & MECHANICAL ENGINEERING

Unit I

**D.C. Generators**: Construction - main parts, materials they are made of, function of the parts. Deduction of emf equation and simple problem Application of D.C. Generators.

**D.C. Motor**: Principle of operation and classification. Speed equations and speed control of shunt and series motor-armature resistance control and field control only-reversal of direction of rotation. Application of D.C. motors.

**A.C. Generators/ Alternators**: Construction - main parts-rotor, stator, slip ring and brushes, exciters and their function. Principle of operation, classification and uses.

Unit II

**A.C. - 3 phase systems**: Connections: a) Star connection- 3 phase, 3 wire and 4 wire systems. b) Delta connection - 3 phase 3 wire systems. Relation between line & phase values of voltage & current - in each case and expression for power. Advantages of 3 phase system over single phase system.

**Transformers**: Construction & principle of operation of single phase transformers. E.M.F. equation and deduction of the relations - N1/N2 = E1/E2 = I1/I2. Connections of 3 phase transformers

**Starters**: a) D.O.L & star/delta starter for squirrel cage motors. b) Rotor- Rheostat starter for slip ring motor.

Reversal of direction of rotation & uses of 3 phase induction motor.

**Storage Batteries (Lead acid cell)**: Construction - different parts, materials they are made of and their functions. Charging - different methods, conditions of full charge. Defects, maintenance & uses.

Unit III

**Stress & Strain**: Simple stress and strain, Hook's law, Poisson’s ratio, stress-strain diagram (Mild steel only) - Elastic limit, yield point, ultimate strength, working stress, factor of safety, elastic constants & relationship among them (deduction not required).

**Steam & Boiler**: Heat and temperature, absolute pressure and temperature, conversion of heat into mechanical work, properties of steam, sensible heat, latent heat of evaporation, wet, dry and superheated steam; enthalpy of steam, (use of steam table). Functions of boilers and their classification, brief description and working principles only of the following boilers - Cochran, Lancashire and Babcock Wilcox. Locations & functions only of the following boiler mountings and accessories - water level indicator, fusible plug, pressure gauge, stop valve, safety valve, economiser, super heater, air preheater and feed pump.
Unit IV

Fluid Mechanics: Properties of fluid, pressure of fluid, pressure head of liquid, pressure gause such as piezometer tube, manometer, fluid flow, equation of continuity of flow, Bernoulli's theorem( proof not required), venturimeter- simple numerical problems. Centre of pressure and depth of centre of pressure on flat surface vertically immersed in a liquid( no proof) problems only. Flow of liquid through notches-definition of notch, type of notches- rectangular notch, triangle notch, formula of discharge through notches ( proof not required). Simple numerical problems no discharge.

Unit V:

Compressed Air: Compressed air as power. Different types of compressions and compressors, work done and HP required for compression( problems on single stage air compressor only), effect of clearance volume, multistage compressors, inter coolers and after coolers, Compressors air transmission and losses in transmission and storage, advantages of use of compressed air in mine. Study of compressed air machines- air turbine only.

Text Books:

Reference Books:

Unit I: Coal face machinery

a) Hand held drills - classification Electronic Rotary drills: Hammer Drills, Epicyclical gear Arrangement-b) Power Loader - Types of loaders, field of applications, working operation- Principle, design and application of long wall face machinery shearer, AFC, Lump breaker - stage loader, power pack self advancing chock shield supports- SERDS and DERDS- their applications- principle of working of AFC (Armoured Face conveyor)- names the constituent parts of AFC-application of Twin Bord AFC, bottom closed AFC- safety devices associated with AFC drive- principle of lump breaker- purpose of power pack- Sequences of overburden Movements in a long wall Panel- classification and capability of the immediate roof in long wall panel- Abutment Pressures in long wall mining- classification of Powered supports in long wall mining- factors governing the selection of power supports- purpose of the following in Power supports
  a. Canopy
  b. Caving Shield
  c. Lamniscate Links-
  d. Extension Canopy
  e. Face Guard
  f. Double acting Advancing Ram- composition of Hydraulic fluid- types of Hydraulic control systems.

Unit II: Flameproof and intrinsically safe apparatus-

Outlines the necessity, FLP vs intrinsically safe apparatus field of application, Frame proofing - constructional features methods of intrinsic safety field or application Remote control principle.

Unit III: Signaling

Method of signaling in mines - electrical signaling, circuit indicators - Mining telephones operation.

Unit IV: Winding

Winding in shafts - purpose, equipment, Types of had gear frames -Shaft fittings - guides in the shafts - pit - top arrangement - keps and suspension gear - Types of drums. Head gear pulley, care skip winging-pit-top and pit-bottom arrangements - Drum winding and skip winding, multi-deck winding and friction winding - Drum and friction winding - Winding engine - depth indicator slow banking arrangement - Methods of speed control - Breaking in winding - Types of breaks.

Unit V: Mine Pumps:

Pumping - Various terms of pumping, classification of pumps - centrifugal pump fittings - Turbine pump, fittings - Eudthrust - submersible pump - fittings Roto Pump, merits limitation - Selection of pumps - computation of numerical problems on Head, Quantity, H.P. Frictional losses.
Text Books:

1. Elements of mining science and Art of mining Digest : D.J Deshmuku Vol.3
2. U.M.S. Volumes

Reference:

1. Statham series Vol.3
2. Mine transport: Kerlin
3. Introduction to mining Engineering : Hartment
DMIC 604 - MINE SAMPLING ASSAYING AND MINERAL PROCESSING

Unit I : Mine Sampling:

Definition, terms, purpose and various uses. Different Sampling Methods. Salting-purpose, safety against salting. Reduction of sampling- Methods used.

Unit II : Assaying:

Introduction - assay map, assay plan factor, assay values, grade value, tenar, type of grade value. Calculations based on average assay value. Estimation of ore reserves.

Unit III : Mineral Dressing:

Unit IV: Coal Processing :

Characteristics of Indian Coal, Why Coal processing is needed? Constituents of coal and their role - Specification of coal to be used in steel plants (for coking coal) and other plants (power plants, cement plants etc),

Unit V: Coal Benification:

Coal quality improvement while mining, Coal handling, dry coal beneficiation, Wet coal beneficiation.

Text Books:

1. Mineral dressing : Gaudin
2. Mine economics : Sinha & Sharma

References:

1. Element of mining : DJ.Deshmukh
2. U.M.S.
3. Mine economics : A.Kumar
DMIP 605 - MINE HAZARD AND SAFETY LAB

List of Experiments

**Study of constructional features & working of self contained breathing apparatus.**
1. Study of various types of Fire Extinguishers used in Mines.
2. Study of constructional features & working of self Rescuer.
4. Study of constructional features & working of Reviving apparatus.
5. Study of working of Burn Side Safety Boring Machine.
6. Study of constructional features & working of Stone Dust Barriers.
7. First aid training to be explained and conducted.

DMIP 606 - PROJECT WORK

Course Contents

Identification of the Project- Collection of data- Organisation of the data- Design of Project elements - Preparation of drawings- Schedules and sequence of operations- Preparation of charts and models- Preparation of report

Objectives

- Identify different works to be carried out in the project.
- Collect data relevant to the project.
- Arrive at efficient method from the available choices based on preliminary investigation.
- Design the required elements of the project as per standard practices.
- Prepare working drawing for the project.
- Prepare schedule of time and sequence of operations.
- Prepare charts or models for each project.
- Prepare project report.

Project may be selected from among the following suggested topics
Underground mining (coal)

1. Bord and pillar mining method Longwall mining method.
2. Blasting gallery method.
3. Stoping methods for non-coal mining Mechanised stoping methods for non-coal mining Opencast mining

1. Pillars extracting by open cast method(coal)
2. Mechanised opencast mining.
3. In Pit crushing technology Surface mining technology Blasting
