Abstract

Online education is a compelling necessity in achieving quality education. With e-learning, students can make out the principle and concepts in precise with less effort. Online mode of teaching with the use of integrated software of LMS, teachers can be able to teach through platforms such as Zoom, Google Classroom, Google Meet, Skype and using interacting tools like jam board and chat box. Part of the Students having laptops and android phones engaged in online classes effectively .Whereas Students of my college belongs to rural and remote village of Thiruvavur and Nagapattinam District had difficulty with e-learning due to poor connectivity and insufficient number of laptops, smart phones and some shortcomings that are witnessed.

Keywords: Online, pandemic, education, rural education, tools.

INTRODUCTION

This research paper discuss about the pros and cons of online teaching. Education system needs continuous up gradation to face the prevailing challenges in the modern era. The UGC allowed top 100 universities as per NIRF to start online program since July 2018 . As per the regulation of September 2020 UGC granted authorization to universities that satisfy NAAC score 3.26 and above or acquiring rank in Top-100 Universities in the category of National Institutional Ranking Framework for at least twice in three preceding cycles at the time of application, shall be permitted to start full-fledged Online programs without prior approval of the UGC. It further encouraged the students to get education without any hardships. Yet the regulation is discreetly allowing the top 100 Universities regarding online education with some restrictions concerning Laboratory oriented subjects. To make our students on par with other fellow mate of students in other countries, online education becomes a compelling necessity to bring out high quality education. As per the demography, Indian population comprises around 27 % of youngsters .To full fill every one needs at low cost, the students require more skill oriented certificate courses through online which can be done at anywhere. Providing Online higher education via Massive Open Online Courses (MOOC) has been encouraged by the Ministry of Human Resource Development for some time now by means of the National Programmed on Technology Enhanced Learning (NPTEL) and Study Webs of Active-Learning for Young Aspiring Minds (SWAYAM) platforms which helps students in accomplishing higher education efficiently.
